

Brochure for detachable X-lattice

Lattice can be installed outside the outer sash in all windows that have an angle of 90-135 degrees between sash and glass. Minimum distance between glass and sash is 13mm.

Lattice can also be installed between the inner and outer sash.

SOLAR X-lattice is made from powdercoated aluminium profile. Perimeter profile is 26x13mm and X-profile is 20x3mm. Standard colors are white RAL 9010, grey RAL 7024 and grey RAL 7040.

Others colors available to order.

Attaching the lattice can be done with special slidepins or with screws.
