

Measuring instructions for detachable X-lattice

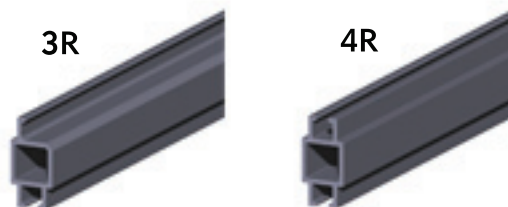

MENTION IN THE ORDER:

- angle between glass and sash (90-135 degrees)
- type of lattice (picture preferred)
- outline measurements
- if the lattice covers whole glass
- method of attachment (slide pin / surface mounting)

In the slide pin -attachment, minimum distance between glass and sash is 13mm. Lattice can also be installed in the frame (surface mounting)

Perimeter profiles
