SOLAR handy

An integrated blind

SOLAR handy is by far the handiest blind on the market.

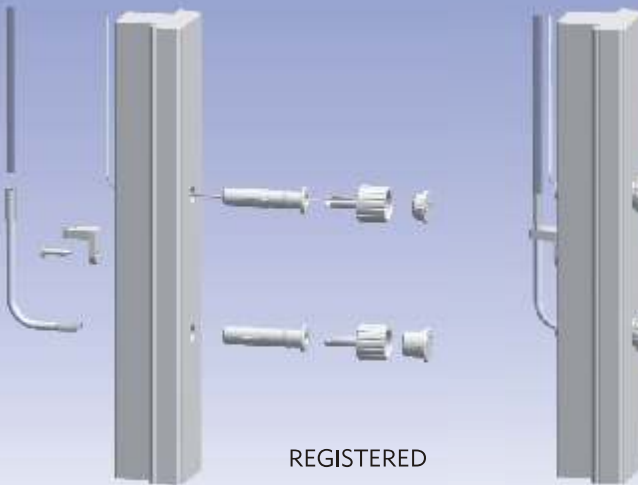

See for yourself:

- the mechanism is hidden behind the frame (you can't see it, 'cause it is hidden ;-)
- blind open/close simply by turning the knob
- blind up/down by pulling the knob
- different coloured knobs
- reasonably priced and durable
- SOLAR handy - really stylish and modern

SOLAR handy conforms to the requirements of the SFS 3304 I class for being airtight and windproof.

SOLAR handy - easy to install

Just press the sleeve into the hole and the knobs on to the sleeves. That is it. SOLAR handy.

No wonder they say it's handy.

→ Pull: the blind goes up and down.

↻ Turn: the blind opens and closes.
