

Installation instruction for fixed insect screen (Type HP4)

1. Place the insect screen frame to an existing window.
2. Mount the plastic fasteners by screws.
3. Mount stopper screws to the bottom side of window to avoid sliding down.

SOLAR- Insect screens has made by using weather proof material. Despite of this and to avoid any damages for insect screen, we recommend to remove the insect screen from window, outside of insect-season. (For example the birds can cause a damage for net)
