

SOLAR SARANA Hyönteisoven asennus

1) Poraa 4 mm reiät reunaprofiilin 18mm leveän ulkoreunan keskelle, sekä ylös että alas, mitoitus kuvassa.

2) Kiinnitä saranakappale vetoniiteillä oveen. Vetoniittien kiinnittämiseen tarvitset siihen tarkoitetut pihdit.

3) Käytettäessä "Pinta-saranointia" ovilevyn tulee ylittää aukko kuvan mukaisesti.

4) "Pinta-saranoiden" rungot kiinnitetään ruuveilla seinäpintaan.

5) Käytettäessä "Syvennys-saranointia" kiinnitetään "Syvennys-saranan" rungot ruuveilla karmin syvennykseen.

6) Työnnä yhdistetty jousimekanismi/saranatappi paikoilleen. Riippuen jousen käteisyydestä se voidaan asentaa myös ylhäältä alaspäin.

7) Aseta muovinen säätömutteri sarana-tapin päähän.

8) Säädä saranan jousivoima kiertämällä säätömutterista. Kierron jälkeen säätömutteri painetaan saranassa olevaan 6-kulmaiseen lukituskoloon. Säätöä voidaan tarpeen mukaan muuttaa.

9) Kiinnitä lopuksi vedin oveen vaaka-tuen kohdalle.

HINGED MOSQUITO DOOR Mounting instruction

1) Drill the holes (diam. 4 mm) onto outside edge of the door frame

2) Mount the hinges by rivets. The special pliers are needed for the rivets.

3) For the face mounting, place the mosquito door onto existing door frame like above.

4) For the face mounting, mount the body of hinges onto existing door frame by screws.

5) For the inside mounting, mount the body of hinges into existing door frame by screws.

6) Place the autoclosure set into hinge. Depending of the type of autoclosure, it will be mountable also from up to down.

7) Place the plastic nut.

8) Set the tension for the closure by screwdriver and push down the hexagon nut for locking the tension.

9) Mount the handle to near of the middle bar.
